What are your observations of the animal's current movement and comfort?

What results are you (the guardian) hoping to achieve through massage for your animal?

Please describe any unique or aggressive behaviors that I should be aware of:

INFORMED CONSENT FOR ANIMAL MASSAGE

I am seeking therapeutic animal massage for my animal of my own accord for the purposes that massage is intended. Such purposes include but are not limited to relaxation, mental wellness, relief of tension of sore muscles, improved proprioception, improved circulation and/or improved range of motion. I agree to update the practitioner to any changes in the animal's mental, emotional or physical health.

I understand:

- Massage is not a replacement for veterinary care.
- Massage Practitioners cannot diagnose or treat illness or lameness.
- Massage Practitioners are unable to provide a prognosis or guarantee a cure.
- Massage is not advised in some cases. Those instances may include animals with fever, certain heart conditions, an active infection or an animal receiving chemotherapy treatment. Massage may be further contraindicated if the animal is suffering from an advanced condition of the immune system or lymphatic system.

I understand and have had explained to me the procedure, benefits, and contraindications for animal massage.
